Additional Information

- After initial purchase of self-run events, purchasers are able to hold additional events without Remio's direct involvement.
- External hosts may book multiple onboarding sessions as needed. Sessions may also be broken into two parts. Additional onboarding sessions may be purchased, which is recommended for multiple events.
- In the Host Training Package, attendee onboarding is the responsibility of the host, not the trainer.
- Full Event Packages have added options, but events hosted by Remio may not be broken into a smaller package.
- Events are up to an hour long. Prices may be adjusted for longer events.
- The minimum size for a Remio hosted event is 20 people. If there are fewer people, the event will still be billed as 20 people.

Important Hardware Information

- **Remio does not rent or sell hardware**, but we have partners that provide this service for you. Remio will not be an intermediary for these transactions though.
- Remio does not provide support across multiple VR devices. This means events will be only Quest, Pico, or HTC. Not a combination of the three headsets.
- Remio does have a PC app and browser app that allows for participation outside of VR.
